Gynecology & Obstetrics

CLINICAL FOCUS

In gynecology, Dr. Saraç evaluates and treats menstrual irregularities, polycystic ovary syndrome, endometriosis and fertility concerns. Menopause is a particular area of interest; she follows women through this period and discusses the available options for managing symptoms according to each patient's history and circumstances.

In obstetrics, she provides pregnancy follow-up and delivery planning. Delivery options in her practice include epidural delivery, cesarean delivery and water birth, and the suitable approach is decided together with the patient on the basis of her medical situation and preferences. Surgical procedures in her scope include hysterectomy and genital aesthetic procedures.

Menstrual irregularities

Menopause

Urinary incontinence

Bladder health and diseases

Pregnancy follow-up

INTERNATIONAL PATIENTS

Dr. Saraç consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
