CLINICAL FOCUS

As a specialist in anesthesiology and reanimation, Dr. Güney is involved in anesthesia planning, monitoring and support for patients before, during and after treatment. His work extends to intensive care treatment, where critically ill patients require continuous observation and organ support, and to advanced life support, which covers the structured management of patients whose vital functions are acutely compromised.

Dr. Güney also has a clinical interest in palliative care and pain management. Palliative care focuses on relieving symptoms and supporting comfort for patients living with serious illness, while pain management addresses the assessment and treatment of persistent or acute pain.

INTERNATIONAL PATIENTS

Dr. Güney speaks Turkish and English, and interpreters can be arranged for patients who need them. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit itself.
