Acibadem Kozyatagi Hospital, İstanbul

DEPARTMENT
Dermatology

CLINICAL FOCUS

Dr. Aydingöz assesses and treats a range of inflammatory skin conditions. These include acne, rosacea, atopic dermatitis, contact dermatitis and sun allergy. Her work also covers pigmentation disorders, including vitiligo, and the evaluation of birthmarks.

Infectious skin conditions form a further part of her practice. She treats skin infections and Candida fungal infections, and provides wart treatment, including the management of genital warts. The choice of treatment in each case depends on the clinical examination and the individual history of the patient.
