Hospital, İstanbul

DEPARTMENT
Dermatology

CLINICAL FOCUS

On the medical side of her practice, Dr. Uysal manages common inflammatory skin conditions, including acne treatment and rosacea management. She also offers hair treatments for patients with hair concerns. Because these conditions vary in severity and often follow a chronic course, treatment is planned individually and may need to be adjusted over time.

Her cosmetic dermatology work includes botulinum toxin applications and wrinkle treatment, fractional laser treatment, microneedling radiofrequency, the gold needle procedure, mesotherapy, and exosome applications. She also treats stretch marks and cellulite.

INTERNATIONAL PATIENTS

Dr. Uysal consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments, and organises the hospital visit.
