DEPARTMENT
Pulmonology

CLINICAL FOCUS

A central part of Dr. Irmak's practice is the evaluation of lung nodules and the diagnostic work-up of lung cancer and other thoracic cancers. She performs bronchoscopy and EBUS (endobronchial ultrasound), procedures that allow tissue and lymph node sampling from the airways and are used to clarify the nature of suspicious findings on...

Dr. Irmak also manages chronic airway conditions such as asthma and chronic obstructive pulmonary disease, as well as acute problems including pulmonary embolism and lower respiratory tract infections such as bronchitis and pneumonia. Her work in sleep medicine covers sleep disorders including insomnia and sleep apnea.
