DEPARTMENT
Neurosurgery

CLINICAL FOCUS

In cranial neurosurgery, Dr. Alver evaluates and treats patients with brain aneurysms, brain tumors and hydrocephalus. Assessment usually begins with a review of the imaging that led to the diagnosis and a discussion of whether observation, surgery or another approach is appropriate for the individual patient.

His spinal practice includes spinal tumors and spinal cord tumors as well as lumbar and cervical disc herniation, conditions in which the decision between non-surgical management and surgery depends on symptoms, neurological findings and imaging. Dr. Alver also performs peripheral nerve surgery;

Brain aneurysms Hydrocephalus Brain tumors

Peripheral nerve surgery Spinal tumors

CONDITIONS TREATED

Brain aneurysms Hydrocephalus Brain tumors

Peripheral nerve surgery Spinal tumors
