CLINICAL FOCUS

A central part of Dr. Özmen's practice is the diagnosis and treatment of thyroid disorders. He also manages endocrine and metabolic conditions, including type 1 and type 2 diabetes, prediabetes, obesity and other metabolic diseases, where care typically involves establishing a diagnosis, agreeing on a treatment plan and reviewing progress over time.

In the digestive field, Dr. Özmen assesses and treats chronic pancreatitis and gastroenteritis, and his clinical interests extend to digestive, liver and biliary tract conditions as well as anaemia. He also sees patients with upper respiratory tract diseases.

INTERNATIONAL PATIENTS

Dr. Özmen consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging — for example ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries — and arranges appointments and the...
