HOSPITAL
Acibadem International Hospital, İstanbul

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Çitil evaluates and treats a range of gynecological conditions. These include menstrual irregularities, endometriosis, polycystic ovary syndrome, and menopause, as well as pelvic pain treatment and vaginismus. She also sees patients with HPV and other sexually transmitted infections, and she manages ectopic pregnancy.

In obstetrics, Dr. Çitil provides pregnancy follow-up and delivery, including epidural delivery. Her work in the Vitro Fertilization and Reproductive Medicine Center means that patients with reproductive health concerns can also be assessed within her practice, with further steps planned according to the findings.

Menstrual irregularities
