CLINICAL FOCUS

Dr. Özer's areas of expertise include heart rhythm disorders such as arrhythmias and atrial fibrillation, for which catheter ablation or pacemaker therapy may be considered depending on the individual case. He also assesses and manages structural and valvular conditions, including heart valve disease, aortic stenosis, rheumatic heart disease and atrial septal defect.

Alongside interventional cardiac procedures, Dr. Özer works in cardiopulmonary rehabilitation, which is directed at patients recovering from or living with cardiac and pulmonary conditions, and in cellular therapy.

INTERNATIONAL PATIENTS

Dr. Özer consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and...
