Organ Transplantation

CLINICAL FOCUS

Dr. Batı's practice is focused on liver transplantation and on the assessment and management of patients with advanced liver disease who may be candidates for transplant evaluation. He sees patients with cirrhosis, metabolic liver diseases and other liver diseases, as well as patients with liver cancer, where the choice between surgical,...

His areas of expertise also extend to pancreatic diseases and biliary tract diseases. Because these conditions often overlap, patients are assessed with attention to the liver, pancreas and bile ducts together, and the suitability of any procedure is judged on the findings of the individual patient rather than on a fixed protocol.

Liver cancer Liver transplantation Metabolic liver diseases
Cirrhosis Pancreatic diseases

CONDITIONS TREATED

Liver cancer Metabolic liver diseases Cirrhosis
Pancreatic diseases Liver diseases
