DEPARTMENT
Dermatology

CLINICAL FOCUS

Dr. Candan's clinical work is centered on dermatology and venereal diseases. In a dermatology consultation, the skin, hair and nails are examined, the history of the complaint is taken, and the findings are used to reach a working diagnosis and decide whether further tests are needed.

Venereal diseases are the second part of Dr. Candan's field. These sexually transmitted infections often present with skin or mucosal signs, and assessment usually involves a targeted history, an examination and laboratory testing before a treatment plan is discussed. Management is individual and depends on the diagnosis, the patient's overall health and any previous treatment.

INTERNATIONAL PATIENTS

Dr. Candan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports, including laboratory and pathology results, previous dermatology notes and discharge summaries, and arranges appointments and the hospital visit.
