Gynecology & Obstetrics

CLINICAL FOCUS

A central part of Dr. Suleymanova's work is urogynecology and pelvic floor health. She assesses and treats urinary incontinence, uterine prolapse and other bladder health concerns, and she follows women through menopause, addressing symptoms and related health questions in this period.

Dr. Suleymanova also manages endometriosis, menstrual irregularities, Bartholin cysts and ectopic pregnancy. Her obstetric work covers pregnancy follow-up and delivery. In addition, her areas of interest include genital aesthetic procedures. Treatment plans are prepared on a case-by-case basis, taking into account the findings of the clinical examination, imaging and laboratory results, and the patient's own priorities.

INTERNATIONAL PATIENTS

Dr. Suleymanova consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
