CLINICAL FOCUS

Dr. Erkan evaluates and treats a range of gynecological conditions, including menstrual irregularities, menstrual pain, pelvic pain and dysfunction, and HPV. A significant part of her practice is menopause care, covering the assessment of symptoms and the discussion of management options appropriate to each patient.

In obstetrics, Dr. Erkan provides pregnancy follow-up and delivery planning. She discusses delivery options with expectant mothers, including epidural delivery and cesarean delivery, so that the plan reflects the clinical situation and the patient's preferences.
