CLINICAL FOCUS

Dr. Tüzken's clinical work is centered on anesthesiology. In general terms, this field is concerned with the assessment of patients before a procedure, the planning and administration of anesthesia, and the monitoring of vital functions during and after surgery or other interventions.

Her second listed area is reanimation, which in the Turkish training system is combined with anesthesiology into a single specialty. Reanimation concerns the support and restoration of vital functions in patients whose breathing or circulation is compromised. Dr.
