CLINICAL FOCUS

The clinical focus of İrem Bektaş is podiatry and foot health. Podiatric care in this setting is concerned with the general condition of the feet, the skin and nails, and the way a person stands and walks. A structured foot assessment forms the starting point for her work: the patient's complaints and history are discussed, the feet are examined, and any findings are documented so that appropriate care can be planned.

Podiatric care is typically an ongoing process rather than a single visit. Depending on the findings of the assessment, İrem Bektaş may recommend follow-up appointments to monitor the condition of the feet over time and to adjust care as needed.

INTERNATIONAL PATIENTS

İrem Bektaş speaks Turkish and English, and interpreters can be arranged for patients who need support in other languages. The international patient team coordinates the collection of prior reports and imaging, such as X-ray, MRI, CT or ultrasound reports, laboratory results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
