Rehabilitation

CLINICAL FOCUS

A central part of İrem Derici Akgüç's practice is the treatment of pelvic pain, an area of rehabilitation that calls for a sensitive, individualised and patient-centred approach. Pelvic pain can affect daily comfort, mobility and quality of life, and physiotherapy is one of the approaches that may be considered as part of its management.

More broadly, she provides physiotherapy within the Physical Medicine & Rehabilitation unit, supporting patients through structured programmes and follow-up. Rehabilitation is generally a gradual process, and the pace and content of a programme depend on the underlying condition, the patient's general health and their personal goals.

INTERNATIONAL PATIENTS

İrem Derici Akgüç consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments...
