CLINICAL FOCUS

The clinical focus of İrfancan Velioğlu is pediatric rehabilitation. Children who need rehabilitation often require an approach that differs from adult care: sessions are planned around the child's age, developmental stage and ability to participate, and families are usually closely involved in the process.

Care discussions with families are based on the child's current condition, previous assessments and the goals set for rehabilitation. The scope and duration of a rehabilitation program depend on the individual case, and expectations are discussed in a realistic and cautious way. Where other specialists are involved in the child's care, rehabilitation is coordinated with their recommendations.

Pediatric rehabilitation

INTERNATIONAL PATIENTS

İrfancan Velioğlu speaks Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and...
