CLINICAL FOCUS

Dr. Subaşı's practice is focused on the radiological assessment of breast diseases. This includes breast imaging and mammography, as well as the interpretation of breast MRI, an area in which she has published on diffusion-weighted MRI of the breast, the use of MRI sequences to estimate the size of invasive breast carcinoma, and mass and...

Her research interests also extend to quantitative perfusion parameters of benign inflammatory breast pathologies, the differentiation of benign and malignant breast lesions using ADC ratios, and the opportunities, challenges, and legal-ethical considerations of artificial intelligence in breast imaging.
