Hospital, İstanbul

DEPARTMENT
Pathology Department

CLINICAL FOCUS

Pathology is a laboratory-based medical specialty. Tissue and cell samples that are removed from a patient during a biopsy or an operation are prepared and examined so that a diagnosis can be established or excluded. Dr. Ekici's contribution lies in this diagnostic assessment: she evaluates the submitted material and documents her findings in a pathology report.

Because pathology results frequently influence which treatment options are considered, Dr. Ekici's work is closely connected with the other departments of the hospital. Diagnostic findings from the Pathology Department support the patient's care pathway and treatment planning, and they are discussed with the treating teams as needed.

INTERNATIONAL PATIENTS

Dr. Ekici communicates in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries.
