DEPARTMENT  
Internal Medicine

## CLINICAL FOCUS

A substantial part of Dr. Dik's work concerns metabolic and endocrine conditions. He assesses and manages type 1 diabetes, type 2 diabetes and prediabetes, and is involved in the diagnosis and treatment of metabolic diseases more generally, including fatty liver disease. He also treats thyroid diseases, where care may involve evaluating thyroid function, interpreting laboratory findings and adjusting treatment over time.

Digestive complaints form the second main area of his practice. Dr. Dik provides Crohn's disease and colitis treatment and sees patients with gastritis and gastroenteritis. Many of the conditions he manages are long-term, and chronic disease management is a central element of his work.

Anaemia   Crohn's disease and colitis treatment   Gastroenteritis  
Prediabetes   Chronic disease management

## INTERNATIONAL PATIENTS

Dr. Dik consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example laboratory and pathology results, ultrasound or other imaging reports, discharge summaries and records of previous treatments, and arranges...
