DEPARTMENT
Bariatric & Metabolic
Surgery

CLINICAL FOCUS

A significant part of Dr. Çalikoğlu's work is in obesity surgery, including sleeve gastrectomy. Patients who are considering a bariatric procedure are assessed individually; whether surgery is appropriate, and which procedure may be suitable, depends on the patient's overall health, medical history and the findings of the pre-operative evaluation.

Dr. Çalikoğlu also treats abdominal wall hernias, including umbilical hernia and inguinal hernia, and manages patients with cholecystitis, an inflammation of the gallbladder. His practice further includes oncological surgery, mastectomy for patients who require breast surgery, and endoscopy, which may be used in the diagnostic evaluation of digestive complaints. In summary, his areas of expertise include:

Umbilical Hernia

Inguinal Hernia

Hemorrhoids and Anorectal Disease Treatment

Colorectal Surgery

Mastectomy

INTERNATIONAL PATIENTS

Dr. Çalikoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, such as ultrasound, CT or MRI reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and organizes the hospital...

CONDITIONS TREATED
