DEPARTMENT
Anesthesiology & Reanimation

CLINICAL FOCUS

Dr. Demirel's practice centers on intensive care and critical care support for patients whose condition requires continuous medical attention. This includes intensive patient monitoring, in which vital functions such as circulation, breathing and other organ systems are observed closely so that changes in a patient's condition can be...

His work also covers anesthesiology and reanimation. This reflects his training in the Department of Anesthesiology and Reanimation and his published work in these fields. Decisions about anesthetic or supportive measures are made on an individual basis after evaluating the patient's medical history, current status and any existing...
