CLINICAL FOCUS

Dr. Cengić performs and interprets a range of imaging examinations. His areas of expertise include head and neck imaging, abdominal ultrasound, thoracic ultrasound and Doppler ultrasound, which is used to assess blood flow in vessels and organs.

Musculoskeletal radiology is another area of his practice, covering imaging of bones, joints and soft tissues. Fluoroscopy, a real-time X-ray technique, is also among the methods he uses. In each case, the choice of imaging method depends on the clinical question, the patient's history and any examinations that have already been...
