Reanimation

CLINICAL FOCUS

Anesthesiology and reanimation covers the assessment of patients before a procedure, the planning and administration of anesthesia, monitoring during the procedure, and care in the recovery period. As an anesthesiology specialist, Dr. Özyılmaz is involved in evaluating each patient's overall health, existing medical conditions and current medications so that an anesthesia plan can be prepared that reflects the individual...

Two further areas form part of his professional interests. Advanced life support refers to the structured measures used in critical situations, such as cardiac or respiratory emergencies, to stabilize a patient and support vital functions.

Palliative care focuses on relieving symptoms and improving comfort for patients with serious or advanced illness, alongside or instead of treatments aimed at the disease itself.

INTERNATIONAL PATIENTS

Dr. Özyılmaz speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. The international patient team coordinates the collection of prior medical documents before a visit, including imaging reports such as MRI, CT, X-ray or ultrasound, laboratory and pathology results, operative notes and discharge summaries, and it arranges appointments and...
