Neurology

CLINICAL FOCUS

Dr. Topalkara evaluates and treats adults with a broad range of neurological conditions. A central part of his work is stroke prevention, including the assessment of risk factors and preventive treatments. He also sees patients with epilepsy, migraine — including advanced migraine treatment protocols — and multiple sclerosis.

In the area of memory and movement disorders, he cares for patients with dementia, Alzheimer's disease, Parkinson's disease and essential tremor, with attention to the neurological changes associated with aging.
