General Surgery

CLINICAL FOCUS

Dr. Nabiyev's clinical work is in general surgery. This field covers a broad group of conditions, and the appropriate treatment for any individual patient depends on the findings of the clinical examination and the review of existing reports and imaging.

Other conditions that are typically assessed within a general surgery unit include thyroid disease, hemorrhoids and fecal incontinence. Where it is clinically suitable, minimally invasive approaches may be considered as part of the discussion of options. Whether a particular procedure is appropriate for a given patient, and whether it falls within Dr.

INTERNATIONAL PATIENTS

Dr. Nabiyev consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
