CLINICAL FOCUS

Dr. Hizel's clinical work covers the diagnosis and management of infectious diseases in adults. This includes evaluating patients with suspected or confirmed infections, interpreting laboratory and microbiological findings, and planning treatment according to the identified cause.

Viral hepatitis is one of his particular areas of interest. Patients with hepatitis may be evaluated through a review of their history, blood tests and any previous results in order to establish the type and stage of the infection and to discuss monitoring or treatment where appropriate. Further information is available on the hepatitis treatment page. Dr.

INTERNATIONAL PATIENTS

Dr. Hizel consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory and pathology results, MRI, CT, X-ray or ultrasound reports, operative notes and discharge...
