CLINICAL FOCUS

Thyroid disorders form a central part of Dr. Çıkım's practice. He evaluates and manages patients with thyroid disease and related metabolic conditions, and his published work includes studies on subclinical hypothyroidism and subclinical hyperthyroidism.

His general internal medicine work also covers hypertension, anaemia, gastroenteritis and upper respiratory tract diseases, as well as the evaluation of poisoning symptoms. In each case, the aim of the consultation is to establish a diagnosis, review any existing test results and agree on a treatment plan appropriate to the individual...
