DEPARTMENT
Neurosurgery

CLINICAL FOCUS

Dr. Özduman's areas of expertise are neurosurgery, neuro-oncology and molecular biology. His published work reflects this combination of surgical practice and research. He has co-authored surgical series on anterior clinoidal meningiomas and on non-meningeal tumors of the cavernous sinus, reviews on the tumor biology and current...

His laboratory research has addressed viral approaches to brain tumors and the developing brain, including studies of vesicular stomatitis virus in multifocal glioma and metastatic carcinoma models, angiogenesis-related gene expression in the neonatal rodent retina as a model of cerebral vascular development, and cytomegalovirus in the...
