HOSPITAL

Acibadem Altunizade
Hospital, İstanbul

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

Orthopedic oncology is a central part of Dr. Özkan's practice. He evaluates and treats bone tumors, bone sarcomas and soft-tissue sarcomas, and performs oncological surgery for these conditions. His work also covers pediatric bone cysts.

Alongside oncology, Dr. Özkan performs hip replacement surgery and knee replacement surgery. Whether a joint replacement is appropriate, and which approach is suitable, is decided individually on the basis of the patient's symptoms, examination findings and imaging.
