CLINICAL FOCUS

Prosthodontics is the branch of dentistry concerned with replacing missing teeth and restoring damaged teeth. Within this field, Dr. Tavuz's areas of expertise are prosthodontic care, restorative dental care, and prosthetic, aesthetic and functional dental rehabilitation.

Treatment planning in these areas depends on a clinical examination, a review of any existing dental imaging and an assessment of the patient's overall oral health. General information about treatments that may come up in a prosthetic or aesthetic rehabilitation plan, such as laminate veneers, E-Max crowns, composite bonding or full mouth reconstruction, is available on this site.

Prosthodontic care

Prosthetic dental rehabilitation

Aesthetic dental rehabilitation

Functional dental rehabilitation

INTERNATIONAL PATIENTS

Dr. Tavuz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT reports, laboratory results and records of previous dental treatment, and arranges appointments and the hospital visit.

CONDITIONS TREATED
