CLINICAL FOCUS

Dr. Turhan's clinical work is centered on thoracic surgery, the surgical discipline concerned with the organs and structures of the chest. This area of practice is often described together with heart surgery under the broader heading of cardiothoracic surgery.

A surgical opinion is formed on the basis of the information available, including existing imaging, laboratory and pathology results and reports of earlier procedures, together with a clinical examination. For this reason, complete and up-to-date records are helpful when a patient seeks an assessment.

INTERNATIONAL PATIENTS

Dr. Turhan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and...
