DEPARTMENT

Emergency Service

## CLINICAL FOCUS

Dr. Mohammadi's specialty is Emergency Service. In general terms, the emergency department is the point of entry for patients with acute or unexpected health concerns, and the physicians who work there are involved in the initial assessment of such patients.

Because the Emergency Service works closely with other departments of the hospital, part of the role involves coordinating with colleagues in other specialties so that a patient's care continues in the appropriate setting once the initial assessment is complete.

## INTERNATIONAL PATIENTS

Dr. Mohammadi communicates with patients in Turkish and English, and interpreters can be arranged for patients who speak other languages. For patients coming from abroad, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, arranges appointments and organises the hospital visit.
