CLINICAL FOCUS

Dr. Karaman's clinical focus is the care of hospitalized patients. As an Inpatient Clinic Physician, he supports the medical care of patients during their admission and works within the hospital care team to help coordinate the treatment they receive while they are on the ward.

For international patients, this means physician-led support during the hospital stay. Dr. Karaman's involvement is directed at the patient's inpatient medical needs and at coordination with the relevant care team, so that treatment decisions taken by the treating specialists are followed through during the admission.

INTERNATIONAL PATIENTS

Dr. Karaman consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a patient travels, the hospital's international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries;
