Radiation Oncology

CLINICAL FOCUS

Dr. Şen's areas of expertise include head and neck cancers, brain tumors, gastrointestinal oncology and breast cancer radiotherapy. In each of these areas her role is to assess whether radiation therapy is appropriate for a given patient, to define the treatment target and dose in the context of the individual diagnosis, and to follow...

She also has expertise in brachytherapy, a form of radiation therapy in which a radiation source is placed inside or close to the tumor. Whether external radiation therapy, brachytherapy or a combination is considered is determined case by case after review of the patient's imaging, pathology and prior treatment history.
