CLINICAL FOCUS

A large part of Dr. Tunç's work relates to the prostate. He evaluates and treats benign prostatic hyperplasia, the non-cancerous enlargement of the prostate that can cause urinary symptoms, as well as prostate cancer.

Dr. Tunç also works in andrology and the treatment of sexual dysfunction, addressing male reproductive and sexual health concerns. For diagnostic purposes, he performs cystoscopy, an endoscopic examination of the urethra and bladder that can help clarify the cause of urinary symptoms or assess the bladder lining.

Prostate disease diagnosis and treatment

Hydronephrosis

INTERNATIONAL PATIENTS

Dr. Tunç speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge...
