CLINICAL FOCUS

Dr. Albayrak's clinical work is centered on gynecology and obstetrics. In gynecology, she sees women with a range of complaints and concerns related to women's health, evaluating symptoms, reviewing any existing test results and discussing the options that may be appropriate for the individual patient.

In obstetrics, her focus is on pregnancy care. This includes the follow-up of women during pregnancy and the discussion of questions that arise before and during this period. Because every pregnancy is different, the nature and frequency of follow-up are decided on an individual basis after the patient's situation has been reviewed. Related information on this site can be found on the Cosmetic Gynecology page.

INTERNATIONAL PATIENTS

Dr. Albayrak consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital visit, so that relevant documents are available at the time of the consultation.
