CLINICAL FOCUS

Dr. Şener evaluates and treats a range of joint diseases, with a particular focus on osteoarthritis and knee replacement surgery. His foot and ankle practice covers conditions such as flatfoot (pes planus) and clubfoot (pes equinovarus), and he also performs deformity surgery and advanced limb reconstruction.

His work in the upper limb includes shoulder and elbow surgery. He additionally treats torticollis and provides movement disorder treatment. Treatment recommendations are made after a clinical assessment and a review of the individual patient's imaging and history;
