SPECIALTY

Orthopedic Surgery & Traumatology

FOCUS

Orthopedic Oncology · Foot and Ankle Surgery

HOSPITAL

Acibadem Adana Hospital

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

Dr. Gülşen assesses and treats a range of orthopedic conditions in children and adults. In pediatric orthopedics, his work includes clubfoot, bone cysts in children, and spasticity in children, as well as spasticity surgery and movement disorder treatment. He also carries out deformity surgery and limb lengthening as part of advanced limb reconstruction, drawing on his training in Ilizarov techniques.

His foot and ankle surgery practice includes flatfoot and diabetic and Charcot foot surgery. In orthopedic oncology, he evaluates and treats bone tumors. He additionally manages spinal deformity and fracture treatment and trauma care. The suitability of any surgical or non-surgical option is decided individually, based on the patient's diagnosis, imaging findings, and overall condition.

Orthopedic oncology

Foot and ankle surgery

Limb lengthening

Clubfoot

Pediatric orthopedics

INTERNATIONAL PATIENTS

Dr. Gülşen consults in Turkish and English, and interpreters can be arranged for other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes, and discharge summaries, and arranges appointments and the hospital visit.
