CLINICAL FOCUS

The core of Dr. Danişoğlu's practice is urologic surgery. In this field, he evaluates patients with conditions of the kidneys, urinary tract and male reproductive organs, and discusses whether surgical or non-surgical management is appropriate in a given case.

Because urological conditions vary widely in their presentation and course, a careful initial assessment is an important step before any intervention is planned. For background reading, this site provides general information on nephrolithiasis treatment and renal ultrasonography; whether any specific investigation or treatment is relevant to an individual patient is determined during consultation with the treating physician.

Urologic surgery

INTERNATIONAL PATIENTS

Dr. Danişoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
