Anesthesiology &
Reanimation

CLINICAL FOCUS

Dr. Bakan's clinical work covers anesthesia and reanimation across the perioperative period, from preoperative assessment through anesthetic management during a procedure to postoperative care. His areas of expertise also include intensive care, cardiovascular anesthesia and pediatric anesthesia.

His published work reflects these areas and includes studies on venous port implantation techniques in pediatric patients, airway supporting maneuvers during flexible fiber optic bronchoscopy in children, the use of a ketamine-propofol mixture in sedation and analgesia, anesthetic management during elective cesarean section, and the...
