CLINICAL FOCUS

A substantial part of Dr. S. Öğüt's work concerns pediatric ophthalmology. He evaluates and treats children with amblyopia (reduced vision in one eye, sometimes called lazy eye), ptosis (drooping of the upper eyelid) and strabismus, a misalignment of the eyes that may affect binocular vision.

In adult ophthalmology, he assesses and treats glaucoma, cataract and retinal diseases, including retinal tears, retinal detachment and macular degeneration. As a neuro-ophthalmologist, he also sees patients whose visual symptoms may arise from disorders of the optic nerve, the visual pathways or eye movement control rather than from the...
