Hospital, İstanbul

DEPARTMENT
Otorhinolaryngology (ENT)

CLINICAL FOCUS

Dr. Ada assesses and treats sinusitis, including cases where symptoms persist or recur despite earlier treatment. In the field of hearing, he sees adults with hearing loss as well as children with paediatric hearing loss, where evaluation typically involves a careful history, examination of the ear and a review of any hearing tests...

In children, his work includes adenoid conditions and tonsil surgery. Whether surgery is appropriate is decided on an individual basis after clinical examination and discussion with the family, and non-surgical options are considered where relevant.
