Orthopedia Hospital

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

A substantial part of Dr. Altuğ's practice is devoted to foot and ankle surgery. This includes the assessment and treatment of clubfoot (pes equinovarus), flatfoot (pes planus), and diabetic foot and Charcot foot conditions, which may require reconstructive surgery when conservative measures are no longer sufficient.

In pediatric orthopedics, Dr. Altuğ treats children with spasticity, torticollis and congenital or acquired deformities. His work in deformity surgery, limb lengthening and advanced limb reconstruction addresses differences in limb length, alignment problems and complex deformities in both children and adults.
