CLINICAL FOCUS

Dr. Barburoğlu's work covers interventional neuroradiology and interventional radiology. These are minimally invasive, image-guided procedures in which catheters and other instruments are guided under imaging rather than through open surgery.

He has co-authored peer-reviewed publications in the field of interventional neuroradiology. These include studies on the endovascular treatment of intracranial aneurysms, among them wide-necked, complex, bifurcation and posterior circulation aneurysms treated with stent-assisted coiling, stent plus balloon-assisted coiling and flow...
