CLINICAL FOCUS

A substantial part of Dr. Çam's practice is head and neck surgery, including the assessment and surgical management of head and neck cancers and salivary gland diseases. He also evaluates patients with hoarseness and other voice changes, where a careful examination of the larynx helps clarify the cause before any treatment is proposed.

In otology, he performs middle ear surgery and assesses patients with hearing loss and vertigo, conditions that often require a stepwise diagnostic approach before options are discussed. His work in sleep disorders addresses snoring and sleep-related breathing problems, drawing on his clinical experience and his published work in this...
