CLINICAL FOCUS

Spine health is a central part of Dr. Sürme's practice. He evaluates patients with spinal complaints, reviews their imaging and previous treatments, and discusses conservative and surgical options based on the individual clinical picture.

His second area of focus is neuromodulation. This includes deep brain stimulation, on which he has co-authored research examining motor and neuropsychiatric outcomes in Parkinson's patients after subthalamic nucleus stimulation, and vagus nerve stimulation for epilepsy. He also works with transcranial magnetic stimulation (TMS) and sacral nerve stimulation.

Transcranial Magnetic Stimulation (TMS)

Vagus Nerve Stimulation for Epilepsy

Deep Brain Stimulation

Sacral Nerve Stimulation

INTERNATIONAL PATIENTS

Dr. Sürme consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT or X-ray reports, laboratory and pathology results, operative notes and discharge summaries,...
