CLINICAL FOCUS

Dr. Hayirlioğlu's clinical work covers the range of tasks that fall within anesthesiology and reanimation. Perioperative assessment involves reviewing a patient's medical history, current medications and existing test results before a procedure in order to plan the anesthetic approach.

He has co-authored publications in peer-reviewed journals on topics related to his field. These include the surgical correction of cor triatriatum sinister in the pediatric population (European Journal of Cardiothoracic Surgery, 2014), the restoration of pulmonary compliance after laparoscopic surgery using a simple alveolar recruitment...
