CLINICAL FOCUS

Dr. Can's clinical work covers both cranial and spinal neurosurgery. On the cranial side, he evaluates and treats brain tumours, including gliomas and meningioma, and provides pituitary disease treatment. His practice also includes cerebrovascular conditions such as brain aneurysms and cerebrovascular occlusion.

In the area of spinal health, he sees patients with low back, neck and back pain, disc herniation and spinal stenosis. He treats spinal deformity and fractures and manages spine and spinal cord tumours. His areas of expertise also include spinal cord stimulation.
