DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Cincik's clinical focus is on infertility and its treatment through in vitro fertilization (IVF) and other forms of assisted reproduction. His background in clinical embryology relates to the laboratory side of IVF, where eggs, sperm and embryos are handled, cultured and assessed before transfer.

His academic work in histology and embryology, including his faculty role in the Department of Histology and Embryology, underpins this laboratory practice. Because assisted reproduction depends on both clinical and laboratory factors, evaluation is individual;

In vitro fertilization (IVF) Assisted reproduction Clinical embryology
Infertility Reproductive endocrinology
